CORN

HORIZON SEEDS Conventional Hybrids Guide 2025

CONVENTIONAL HYBRIDS		CHU	Early planting	Highly productive soil	Droughty lighter lower fertility soil	Corn after corn	High population response	Low population response	Best grain quality	Fast early drydown	Semi-flex ear	Determinate ear	Flex ear	Hybrid for ear picking	Population high productive soil
HZ 1840 RM 78 days		2350	✖	✖		✖		✖					✖		34 K/a
HZ 2315 RM 83 days		2500		✖	✖		✖			✖			✖		38 K/a
HZ 2945 RM 89 days		2675	✖	✖	✖			✖	✖	✖	✖			✖	36 K/a
HZ 3015 RM 90 days		2700	✖	✖		✖		✖		✖	✖			✖	36 K/a
HZ 3260 RM 92 days		2750	✖		✖	✖		✖	✖		✖			✖	36 K/a
HZ 3511 RM 95 days		2850	✖	✖		✖	✖			✖	✖			✖	34 K/a
HZ 3883 RM 98 days		2950			✖	✖	✖		✖	✖	✖				36 K/a
CONVENTIONAL HYBRIDS Best: 10 Worst: 1		CHU	Grain yield	Seed vigor	Drought tolerance	Standability	Stay green	Test weight	Silage use	Ear placement	Plant height	Population range	Cob color	GDU to black layer	
HZ 1840 RM 78 days		2350	9	8	7	9	8	9	9	Medium	Moderately tall	Medium high	Pink	1980	
Great hybrid dual purpose, huge gurthy ears, great kernel depth, good vigor and drydown (Sand 32,Loam 34,clay 36 final population)															
HZ 2315 RM 83 days		2500	9	8	9	10	8	9	9	Medium high	Tall	High	Red	1980	
Great hybrid dual purpose, excellentstalks and roots, very good drought performance and drydown (Sand 32,Loam 36 ,Clay 38 final population)															
HZ 2945 RM 89 days		2675	9	10	8	10	8	9	6	Medium	Medium	Medium	Dark Red	2150	
Excellent tip fill with a slender ear type and excellent grain quality. Excellent stalk strength (Sand 32,Loam 34,Clay 36 final population)															
HZ 3015 RM 90 days		2700	9	10	8	9	8	9	9	Medium	Tall	Medium high	Red	2175	
Quick emergence with excellent vigour and early canopy cover. Higher than average test weight and ear flex (Sand 32,Loam 34,Clay 36 final population)															
HZ 3260 RM 92 days		2750	9	8	8	8	9	7	9	Medium high	Tall	Medium high	Pink	2200	
High top end yield potential, competes with GMO seed, excellent fall ear droop (Sand 32,Loam 33,Clay 34 final population)															
HZ 3511 RM 95 days		2850	9	9	9	7	7	9	7	Medium	Medium	Medium	Red	2300	
Strong yield punch, excellent early season vigor, great appearance with very good drought tolerance and test weight (Sand 32,Loam 34,Clay 34 final population)															
HZ 3883 RM 98 days		2950	9	10	9	10	9	9	9	High	Tall	Medium high	Red	2350	
Hybrid dual purpose performing very well in all environments, excellent early season vigor, drought tolerance and good plant heat & staygreen (Sand 32, Loam 34, Clay 36 final population)															
Available untreated, fungicide only and Fortenza + fungicide															

Synagri (Head Office)
